

IP PHONE MANAGER

Powerful and intuitive life-cycle management for enterprise IP phone deployments

In today's highly complex and demanding world of enterprise communications, IT managers need to be able to have full control of their IP phone deployments throughout the devices' life-cycle. Administrators need powerful and easy-to-use tools for tasks such as configuration, troubleshooting and monitoring to increase efficiency and ensure user satisfaction.

AudioCodes IP Phone Manager enables administrators to offer a reliable desktop phone service within their organization. With the ability to deploy and monitor AudioCodes IP phones, identify problems and fix them rapidly and efficiently, AudioCodes IP Phone Manager delivers employee satisfaction, increased productivity and lower IT expenses.

Key benefits:

- Simplified deployments with zero-touch installation
- Support for managed services environments through multi-tenancy
- Enhanced troubleshooting and rapid recovery
- Reduced operational expenses thanks to remote management and configuration
- Supports remote management of IP phones behind NAT (via AudioCodes SBC or media gateway)

IP Phone Manager Express

- Available as **FREE** download
- Suitable for evaluation or deployments of up to 500 IP Phones
- One click upgrade to IP Phone Manager Pro
- Customer support available for additional charge

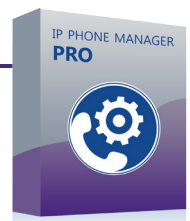

IP Phone Manager for CloudBond 365™

- Included in CloudBond 365 bundle
- Runs on CloudBond 365 appliance
- Fully integrated with the CloudBond 365 Skype for Business features

IP Phone Manager Pro

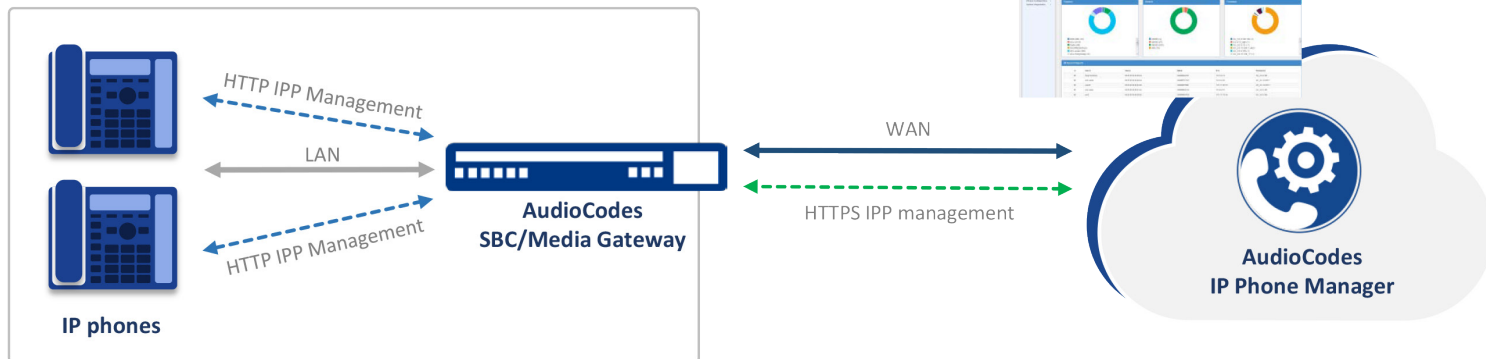

- Fully integrated with the AudioCodes Element Management System
- Suitable for installations of over 500 IP Phones
- Supports multi-tenancy
- Server-based or virtualized application

Managing IP Phones behind NAT

AudioCodes IP Phone Manager enables devices to be managed remotely even when they are behind a NAT via an on-site AudioCodes SBC or media gateway. No additional software or hardware is needed.
